HELPING SMALL BUSINESSES NAVIGATE TARIFFS HOW TARIFFS IMPACT SMALL BUSINESSES

Tariffs are currently influencing thousands of small businesses in the United States through increased costs, operational uncertainty, and supply chain changes. Tariffs can harm small businesses in the long run, especially if they rely heavily on imported goods or materials. Sustained higher costs can erode profitability, limit growth opportunities, and make it difficult to compete with larger companies that have more resources to adapt.

Key Information About Tariffs

- A tariff is a tax applied to imported goods, paid by the U.S. recipient at the port of entry.
- Tariffs generally apply to imported goods rather than services.
- Widespread tariffs may result in retaliatory measures from trading partners, which can affect American exports, workers, and farmers.

AI'S IMPACT ON JOB MARKET: WHICH ROLES ARE THREATENED FIRST

As artificial intelligence rapidly automates repetitive tasks across various sectors, workers face a crossroads: embrace higher-value, human-driven roles or risk obsolescence.

Artificial intelligence (AI) continues to accelerate its reach into various fields, automating repetitive tasks and challenging the status quo of numerous professions. This technological evolution leaves workers at a critical juncture—adapting to higher-value roles that leverage human creativity and judgment or risking the potential obsolescence of their occupations.

A common reaction among professionals is skepticism regarding AI's impact. Many have dabbled with AI tools once, found them lacking, and subsequently dismissed them as inconsequential. However, this underestimation belies the reality: AI is quietly reshaping industries through enhanced efficiency and cost-effectiveness, a progression often met with surprise by industry insiders who initially believed they had ample time to adapt.

IMMIGRATION NEWS

TRUMP ADMINISTRATION PROPOSES STRICTER CITIZENSHIP TEST AND H-1B REFORMS

The Trump administration is set to introduce significant immigration reforms, targeting the H-1B visa program and the U.S. citizenship test, with plans to make both processes more challenging.

The Trump administration is preparing to implement a new wave of immigration reforms aimed at changing the visa system for skilled foreign workers and revising the citizenship test. Joseph Edlow, the newly appointed Director of U.S. Citizenship and Immigration Services (USCIS), detailed these plans in an interview with The New York Times, describing the existing citizenship evaluation as "easy."

"The test as it's laid out right now, it's not very difficult. It's very easy to kind of memorize the answers. I don't think we're really comporting with the spirit of the law..."

WHAT TO DO IF LAID OFF ON H-1B OR L-1 VISA

Losing a job in the United States can significantly impact foreign nationals on H-1B or L-1 work visas, as it may trigger a time-sensitive need to secure new employment or alter their immigration status.

Losing employment in the United States is difficult for anyone, but for foreign nationals on H-1B or L-1 visas, it presents unique challenges. Their legal status is directly tied to their jobs, meaning job loss can start a countdown to finding a new position or changing immigration status before they fall out of lawful presence. Legal experts stress the importance of swift and strategic action during this crucial period.

Under U.S. immigration regulations, H-1B and L-1 visa holders are typically provided a 60-day grace period following the termination of employment. This grace period begins the day after one's last working day, not the final date of receiving payroll or severance benefits. During these 60 days, affected individuals have the opportunity to secure new employment, enabling a new employer to file a visa transfer petition, or they can request a change in immigration status...
